

# ASHISH DHONDIBA CHANDAN

Software Engineer

Pune, Maharashtra | +91 9970325759 | ashishchandan0425@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in programming fundamentals, data structures, and object-oriented design, and hands-on experience across the full software development lifecycle (SDLC) — from design and development to debugging, troubleshooting, testing, and deployment. Skilled in Python, Java, TypeScript, FastAPI, React, Next.js, PostgreSQL, Docker, and Git, with practical exposure to Agile/Scrum workflows, code reviews, technical documentation, and AI-assisted development tools. Strong analytical and problem-solving skills, with experience collaborating across cross-functional teams to build production-oriented applications including RAG pipelines, multi-agent AI systems, and scalable backend services. A quick learner who communicates effectively and takes ownership of code quality, collaboration, and continuous improvement.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript, Java, SQL

**Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), SDLC, Agile/Scrum, Debugging & Troubleshooting

**Professional Skills:** Analytical & Problem-Solving, Cross-Functional Collaboration, Technical Documentation, Written & Verbal Communication

**Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3

**Backend & APIs:** FastAPI, Spring Boot, Node.js, REST APIs, SQLAlchemy 2.0, JWT

**Databases & Caching:** PostgreSQL, Redis, Supabase, BigQuery

**AI & LLM Engineering:** RAG, LLM Integration, AI Agents, Multi-Agent Systems, Qdrant, Pinecone, AWS Bedrock, Mistral, Sentence Transformers, Embeddings, Semantic Search

**Cloud & DevOps:** AWS, AWS S3, Docker, Vercel, Git, GitHub

**Tools & Architecture:** Selenium, BeautifulSoup, Dramatiq, RBAC, Multi-Tenancy, Background Jobs, Jira

## PROFESSIONAL EXPERIENCE

### Freelance Full Stack Developer — Hyacinte AI

May 2026 – Jun 2026

Remote — Ghana Client

- Delivered a backend prototype for a bilingual English/French AI executive intelligence platform targeting the ECOWAS region within a two-month freelance engagement.
- Engineered a RAG pipeline using Qdrant, Sentence Transformers, and AWS Bedrock with Mistral Large 2, enabling tenant-scoped retrieval and source-grounded AI responses.
- Designed a multi-tenant PostgreSQL architecture with organization-level data isolation, RBAC, and secure JWT authentication.
- Built fully asynchronous APIs and database workflows using FastAPI, SQLAlchemy 2.0, and asyncpg.
- Implemented background processing with Redis and Dramatiq for OCR, PDF ingestion, semantic chunking, and embedding generation workflows.
- Containerized backend services with Docker and delivered the prototype from architecture through implementation within the engagement timeline.

### Software Engineer Intern — Urbanroof Pvt. Ltd.

Oct 2025 – Feb 2026

- Engineered a RAG-based AI chatbot using Next.js, Claude/OpenAI APIs, and Pinecone, reducing average support query resolution time by 60%.
- Developed and maintained 10+ REST API endpoints using FastAPI for core business workflows, achieving average response times below 200 ms.
- Built an automated web-scraping pipeline using FastAPI, Selenium, and BeautifulSoup to extract and normalize data from 15+ websites, reducing manual data entry by 80%.
- Developed a responsive web application from Figma designs using Next.js 15, delivering consistent functionality across major browsers and device sizes.
- Built data-transformation pipelines that converted scraped content into standardized JSON consumed by 3 downstream services.
- Utilized AWS S3 and Docker for file storage and containerization, contributing to a 50% reduction in environment-related issues.

### Software Intern — ScaleFull Technologies

Mar 2025 – Aug 2025

- Developed and maintained responsive websites based on business and client requirements.
- Built and refined user interfaces with a focus on responsive design, usability, and cross-browser compatibility.
- Implemented website features and UI components while collaborating with the development team to deliver project requirements.
- Debugged and resolved frontend issues to improve website functionality and user experience.

## PROJECTS

### Eleva — AI Career Operating System | Next.js, TypeScript, React, Supabase, LLM APIs, Tailwind CSS, Vercel

- Built a full-stack AI career platform for resume tailoring, ATS analysis, cover-letter generation, job insights, and personalized AI workflows; engineered a multi-stage pipeline for job-description extraction, scoring, planning, resume tailoring, rescoring, and recruiter-style review.
- Designed configurable LLM provider and model routing with fallback handling for rate limits and provider failures, and developed responsive interfaces using Next.js, React, TypeScript, and Tailwind CSS with authentication and persistent application data.

GitHub: [github.com/chandu954/Eleva](https://github.com/chandu954/Eleva)

### Research Swarm — Multi-Agent AI Research System | Python, LLMs, AI Agents, Multi-Agent Systems, Agent Orchestration

- Built a multi-agent AI research system for decomposing complex research objectives into specialized tasks and coordinating autonomous agents, with orchestration workflows for task classification, delegation, execution, and result synthesis.
- Implemented persistent AI memory to retain execution context across research workflows and designed modular components for research planning, execution, memory, and agent coordination to improve maintainability and extensibility.

## EDUCATION

### Bachelor of Engineering (B.E.) — Computer Engineering | 2022 – 2026

Ajeenkya DY Patil School of Engineering, Pune
